index index index

by Elliot Linzer

Here is the annual index of all the articles, reviews, and poetry published in WIN during 1982. With this index you can see at a glance what issues were covered in depth and what issues received sparse coverage. Comparing indexes over the years, it becomes clear how the emphases for movement activity have shifted both as a result of changes in the world and as a result of discussion within the movement.

As usual, all articles are indexed by author(s) and by subject(s), but not by titles. The subject headings are rather arbitrary, so if you don't find what you are looking for, try another heading. I would like to index the letters which appear in every issue, but that would require taking space which might be better filled with more articles.

Similarly, the *Changes* and art which have appeared in WIN in the past year are not indexed.

If you look carefully, you will see that I and the editors of WIN have carefully inserted several errors into the index. That is done to maintain a consistency between this index and the content it reflects.
